This total package heifer would benefit any program. She has given me 2 excellent replacement heifers or else I would be keeping her. She measured 65.0" TTT at 4.0 years but is just now twisting out for accelerated TTT growth. Plus she is 25% Texana Van Horne who grew another 18 inches TTT after age 4. We have chosen a select mating with GLR Coronado to add more WS Jamakizm and Texana Van Horne to the calves' pedigree.
